

Excellence in Air Filtration Since 1936
Employee-Owned & Operated

Your National Source for Data Center Filtration

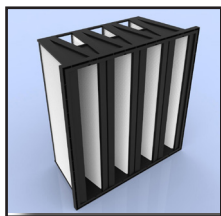

Ensuring Clean Air and Optimal Performance in Mission-Critical Environments

Puracell® II LR

Puracell® II P & PH

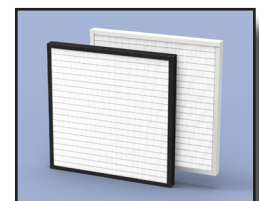

Puracell® VP & VP-S

Data centers are the backbone of modern digital infrastructure. With thousands of servers operating continuously, maintaining optimal environmental conditions is essential. Airborne contaminants—dust, pollen, chemical vapors—can compromise equipment performance, increase maintenance costs and shorten hardware lifespan. Filtration systems play a vital role in mitigating these risks.

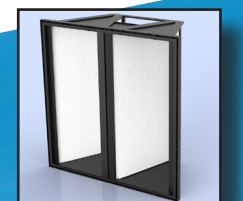

Glasfloss offers a full line of high efficiency filtration products designed for the high demands of Data Center applications. Available with synthetic or fiberglass media, performance ranges from MERV 11-16 and depth options of 2”, 4”, 6” & 12”.

Z-Line® Pleated

Puracell® II 2” Depth

Puracell® VPX & VPX-S

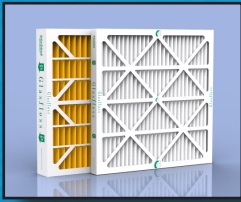

“Serving You With Locations Throughout The Nation”

Glasfloss has a policy of uninterrupted research, development and product improvement and reserves the right to change design and specifications without notice.

DATECENTER 9/23/25

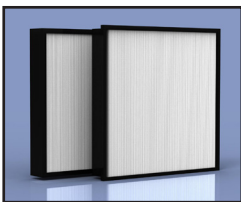

Z-Line® Pleated

- MERV 10, 11 & 13
- Heavy-Duty Moisture Resistant Construction
- Galvanized Expanded Metal Backing
- Standard Size 4” and 6” Thick Incorporate Media Separators

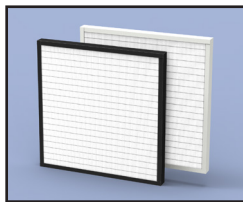

Puracell® II LR

- MERV 15 Performance
- Beverage Board or Plastic Frame
- Plastic Frame Available in Box or Header Style
- Ultra Low Initial Resistance = Energy Savings

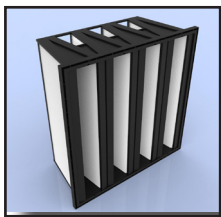

Puracell® II P & PH

- Compact Design for Maximum Air Flow
- Lightweight High-Impact Polystyrene Plastic Frame Construction
- Box and Header Style Frames
- MERV 11, 13, 14 and 15
- Media Will Not Support Microbial Growth

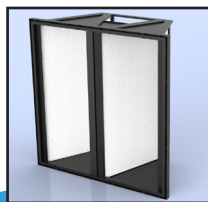

Puracell® II 2” Depth

- 100% Synthetic Media
- High Impact Plastic Frame or Beverage Board Frame
- 2” Depth Design
- MERV 11, 13 & 15 Performance Ranges
- Media Will Not Support Microbial Growth

Puracell® VP & VP-S

- 8-Pack Construction
- High Efficiency Microfiber or 100% Synthetic Media
- Low Resistance = Energy Savings
- Moisture Resistant Construction
- MERV 11 to 16 & 99.97%
- Lighter Weight = Reduced Shipping Cost

Puracell® VPX & VPX-S

- 4-Pack Construction
- High Efficiency Microfiber or 100% Synthetic Media
- Low Resistance = Energy Savings
- Moisture Resistant Construction
- MERV 11 to 15
- Lighter Weight = Reduced Shipping Cost
