

Excellence in Air Filtration Since 1936
Employee-Owned & Operated

Premium Solutions for Commercial Buildings

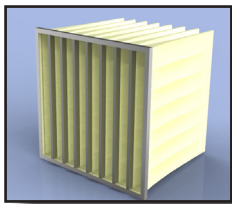

Applications

- Office Buildings
- Hospitals and Healthcare Facilities
- Schools and Universities
- Retail Stores and Shopping Centers
- Hospitality and Entertainment Venues
- Manufacturing Plants

Puracell® II Mini-Pleat Filters

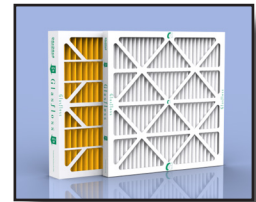

are ideal for applications requiring high efficiency in a 2" to 6" mini-pleat design. Available in MERV 11 to MERV 15 efficiencies.

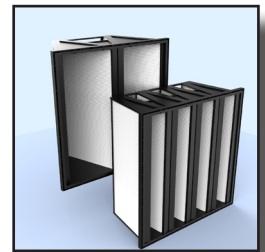

Excel® and Purapak® Bag Filters

offer excellent performance with low pressure drop and long service life in MERV 9 to MERV 15 efficiencies.

Glasfloss HVAC air filters are engineered to meet the rigorous demands of commercial and institutional environments. Renowned for their superior performance, durability, and reliability, Glasfloss filters help maintain optimal indoor air quality while reducing operational costs. Whether you manage an office complex, hospital, school, or retail space, Glasfloss has a filter solution designed to ensure cleaner, healthier air for your building occupants.

Z-Line® Pleated Filters provide MERV 10, 11 & 13 performance ranges for strong particle size capture and excellent service life.

Puracell® VP/VPX Filters offer high efficiency particulate removal, extended service life and extremely low air flow resistance in MERV 11 through 99.97% efficiency.

"Serving You With Locations Throughout The Nation"

Glasfloss has a policy of uninterrupted research, development and product improvement and reserves the right to change design and specifications without notice.
